## Leaving Certificate 2023

Marking Scheme

## Applied Mathematics

Ordinary Level

## Note to teachers and students on the use of published marking schemes

Marking schemes published by the State Examinations Commission are not intended to be standalone documents. They are an essential resource for examiners who receive training in the correct interpretation and application of the scheme. This training involves, among other things, marking samples of student work and discussing the marks awarded, so as to clarify the correct application of the scheme. The work of examiners is subsequently monitored by Advising Examiners to ensure consistent and accurate application of the marking scheme. This process is overseen by the Chief Examiner, usually assisted by a Chief Advising Examiner. The Chief Examiner is the final authority regarding whether or not the marking scheme has been correctly applied to any piece of candidate work.

Marking schemes are working documents. While a draft marking scheme is prepared in advance of the examination, the scheme is not finalised until examiners have applied it to candidates' work and the feedback from all examiners has been collated and considered in light of the full range of responses of candidates, the overall level of difficulty of the examination and the need to maintain consistency in standards from year to year. This published document contains the finalised scheme, as it was applied to all candidates' work.

In the case of marking schemes that include model solutions or answers, it should be noted that these are not intended to be exhaustive. Variations and alternatives may also be acceptable. Examiners must consider all answers on their merits, and will have consulted with their Advising Examiners when in doubt.

## Future Marking Schemes

Assumptions about future marking schemes on the basis of past schemes should be avoided. While the underlying assessment principles remain the same, the details of the marking of a particular type of question may change in the context of the contribution of that question to the overall examination in a given year. The Chief Examiner in any given year has the responsibility to determine how best to ensure the fair and accurate assessment of candidates' work and to ensure consistency in the standard of the assessment from year to year. Accordingly, aspects of the structure, detail and application of the marking scheme for a particular examination are subject to change from one year to the next without notice.

## In considering this marking scheme for the written examination, the following points should be noted.

1. The marking scheme shows one correct solution to each question. In many cases there are other equally valid methods. The descriptions, methods and definitions in the scheme are not exhaustive and alternative valid answers are acceptable.
2. The detail required in any answer is determined by the context and manner in which the question is asked, and also by the number of marks assigned to the answer in the examination paper. Therefore, in any instance, it may vary from year to year.
3. A solidus (/) indicates different valid attempts.
4. A number of different types of penalties are applied to candidates' work, including:

- mathematical error ("blunders")
- mathematical/numerical slip
- misreading (if not serious or leading to oversimplification)

5. A misreading or error or omission which oversimplifies the question may be regarded as equivalent to a mathematical error and is marked accordingly.
6. In cases where a question item is marked using a marking scale, the scale is provided in bold. For a 20 mark item marked using a marking scale:

- 17 marks are awarded where candidate work shows one systemic error.
- 14 marks are awarded where candidate work shows two systemic errors.
- 8 marks are awarded where a valid attempt is presented which cannot be awarded higher marks.

For a 15 mark item marked using a marking scale:

- 12 marks are awarded where candidate work shows one systemic error.
- 9 marks are awarded where candidate work shows two systemic errors.
- 6 marks are awarded where candidate work shows two systemic errors or where a valid attempt is presented which cannot be awarded higher marks.

For a 10 mark item marked using a marking scale:

- 7 marks are awarded where candidate work shows one systemic error.
- 4 marks are awarded where candidate work shows two systemic errors or where a valid attempt is presented which cannot be awarded higher marks.

7. A zero should only be recorded when the candidate has attempted the question item but does not merit marks. If a candidate does not attempt a question item examiners should record NR.
8. Examiners are expected to annotate parts of the responses as directed at the marking conference. (See below.)

| Symbol | Name | Use |
| :---: | :---: | :---: |
| $x$ | Cross | Incorrect element |
| - | Tick | Correct element |
| s | Slip | Deduct one mark |
| 2 | Box 2 | Partially correct element - award 2 marks |
| $\wedge$ | $\wedge$ | Missing element |
| $\cdots$ | Horizontal wavy line | To be noticed |
| \} | Vertical wavy line | Additional page |

9. Bonus marks at the rate of $5 \%$ of the marks obtained will be given to a candidate who answers the written examination paper entirely through Irish and who obtains $75 \%$ or less of the total mark available (i.e. 300 marks or less). In calculating the bonus to be applied decimals are always rounded down, not up $\neg$ e.g., 4.5 becomes $4 ; 4.9$ becomes 4 , etc. See below for when a candidate is awarded more than 300 marks in the written examination paper.

## Marcanna Breise as ucht freagairt trí Ghaeilge

Léiríonn an tábla thíos an méid marcanna breise ba chóir a bhronnadh ar iarrthóirí a ghnóthaíonn níos mó ná $75 \%$ d'iomlán na marcanna.
N.B. Ba chóir marcanna de réir an ghnáthráta a bhronnadh ar iarrthóirí nach ngnóthaíonn níos mó ná $75 \%$ d’iomlán na marcanna don scrúdú. Ba chóir freisin an marc bónais sin a shlánú síos.

Tábla 400 @ 5\%
Bain úsáid as an tábla seo i gcás na n-ábhar a bhfuil 400 marc san iomlán ag gabháil leo agus inarb é $5 \%$ gnáthráta an bhónais.

Bain úsáid as an ngnáthráta i gcás 300 marc agus faoina bhun sin. Os cionn an mharc sin, féach an tábla thíos.

| Bunmharc | Marc Bónais |
| :---: | :---: |
| $301-306$ | 14 |
| $307-313$ | 13 |
| $314-320$ | 12 |
| $321-326$ | 11 |
| $327-333$ | 10 |
| $334-340$ | 9 |
| $341-346$ | 8 |
| $347-353$ | 7 |

| Bunmharc | Marc Bónais |
| :---: | :---: |
| $354-360$ | 6 |
| $361-366$ | 5 |
| $367-373$ | 4 |
| $374-380$ | 3 |
| $381-386$ | 2 |
| $387-393$ | 1 |
| $394-400$ | 0 |
|  |  |

1(a) (i)
$\left(\begin{array}{lllll}0 & 1 & 0 & 0 & 2 \\ 1 & 0 & 1 & 0 & 0 \\ 0 & 1 & 0 & 1 & 0 \\ 0 & 0 & 1 & 1 & 1 \\ 2 & 0 & 0 & 1 & 0\end{array}\right)$
10 [0/4/7]

1(a) (ii)
$\left(\begin{array}{cc}3 & 4 \\ -1 & -2\end{array}\right)\left(\begin{array}{cc}-1 & 2 \\ 0 & 3\end{array}\right)=\left(\begin{array}{cc}3(-1)+4(0) & 3(2)+4(3) \\ -1(-1)-2(0) & -1(2)-2(3)\end{array}\right)=\left(\begin{array}{cc}-3 & 18 \\ 1 & -8\end{array}\right)$
10 [0/4/7]

1(b) (i)
$M_{3}=1.56 \mathrm{~kg}$
$M_{4}=1.43 \mathrm{~kg}$

1(b) (ii)
$8 \%=0.08$ and $1-0.08=0.92$

1(b) (iii)
$M_{6}=0.92^{6}(2.0)=1.21 \mathrm{~kg} 5$
$2.0-1.21=0.79 \mathrm{~kg} 5$

1(b) (iv)
$\begin{array}{ll}0.92^{n}(2.0)=1 & 5 \\ 0.92^{n}=0.5 \text { i.e. } n \geq \frac{\ln 0.5}{\ln 0.92}=8.31 \text { so } n=9 & 5\end{array}$

2(a) (i)

2(a) (ii)
$\mu R=\frac{1}{2}(0.335 \times 9.8)=1.6415 \mathrm{~N}$

## 2(a) (iii)

$T=\frac{2 \pi}{\omega}$ so $\omega=\frac{2 \pi}{1.2}=5.236\left[\right.$ radians $\mathrm{s}^{-1}$

2(a) (iv)
$1.6415=m r \omega^{2}$ so $r=0.179 \mathrm{~m}$

2(b) (i)

2(b) (ii)
$T \cos 32^{\circ}=m g=53.9 \mathrm{~N}$ so $T=63.56 \mathrm{~N}$

2(b) (iii)
$T \sin 32^{\circ}=m r \omega^{2}$ 5
$=5.5 \times\left(2 \sin 32^{\circ}\right) \omega^{2}$ so $\omega=2.4$ radians s $^{-1}$ 5

3 (i)
$\vec{s}=-\frac{1}{2} \vec{q}-\vec{r}=\vec{\imath}-7 \vec{\jmath}$

3 (ii)

## 3 (iii)

$|\vec{q}|=\sqrt{\left(6^{2}+8^{2}\right)}=10$
$|\vec{r}|=\sqrt{\left((-4)^{2}+3^{2}\right)}=5$

3 (iv)
$\tan \alpha=\frac{8}{6}$ so $\alpha=53.13^{\circ}$
$\tan \beta=\frac{3}{4}$ so $\beta=36.87^{\circ}$

3 (v)
$\vec{q} \cdot \vec{r}=(6)(-4)+(8)(3)=0$

3 (vi)
$90^{\circ}$

3 (vii)
$6 k-4 t=-10$ and $8 k+3 t=20 \quad 5$
$k=1$ and $t=4 \quad 5$

4(a) (i)

-1 for each incorrect/missing/mislabelled/additional edge
4(a) (ii)

Kruskal's algorithm
$|C E|=145$
$|A E|=190$
$|B E|=210$
$|A B|=300$
$|C D|=425$

Prim's algorithm
Choose node $A$, say.
$|A E|=190$
$|C E|=145$
$|B E|=210$
$|C D|=425$

15 [0/6/9/12]

Deduct 3 marks if the algorithm used is not correctly named.
Allow 3 marks for the name of a correct algorithm if no other work is presented.

## 4(a) (iii)

$4(6500)+(145+190+210+425)(525)=€ 535250$
4(b)
$A: B(75), C(105), D(84)$
$B: D(135), E(174)$
$D: E(133), F(219)$
C: $G(192)$
$E: F(224), H(296)$
G: $1(380)$
F: I(330)
H: $\ddagger(344)$
Path $=A \rightarrow D \rightarrow F \rightarrow I$
Cost $=€ 330$

5(a) (i)
$24.5 t-4.9 t^{2}=0 \quad 5$
time of flight $=5 \mathrm{~s}$

5(a) (ii)
$14 \times 5=70 \mathrm{~m}$

5(a) (iii)
$20=24.5 t-4.9 t^{2} \quad 5$
$4.9 t^{2}-24.5 t+20=0 \quad 5$
so $t=1.03 \mathrm{~s}$ or $t=3.97 \mathrm{~s} \quad 5$

5(a) (iv)

5(b)
Y
justification

## 6 (i)

$$
18 \div 4.5=4 \mathrm{~s}
$$

## 6 (ii)

$\frac{1}{2}(4.5)\left(4^{2}\right)=36 \mathrm{~m}$

## 6 (iii)

$18 \times 26=468 \mathrm{~m}$
$468+36=504 \mathrm{~m}$

6 (iv)
$(11-8.5) \div 0.5=5 \mathrm{~s}$

6 (v)

5, 5

6 (vi)
$[36+(18 \times 16)]-\left[(8.5 \times 5)+\frac{1}{2}(0.5) 5^{2}+(11 \times 15)\right]$
$=324-213.75=110.25 \mathrm{~m}$

7 (i)
PCM

$$
\begin{aligned}
& 6(3)+4(1.5)=6\left(v_{1}\right)+4\left(v_{2}\right) \\
& 3 v_{1}+2 v_{2}=12
\end{aligned}
$$

NEL

$$
\begin{array}{ll}
v_{1}-v_{2}=-\frac{2}{3}(3-1.5)=-1 \text { so } v_{1}=v_{2}-1 \\
v_{1}=2 \mathrm{~m} \mathrm{~s}^{-1} & v_{2}=3 \mathrm{~m} \mathrm{~s}^{-1}
\end{array}
$$

7 (ii)
$\frac{1}{2}(6) 3^{2}+\frac{1}{2}(4) 1.5^{2}$
$=27+4.5=31.5 \mathrm{~J}$

7 (iii)
$31.5-\left[\frac{1}{2}(6) 2^{2}+\frac{1}{2}(4) 3^{2}\right]$
$=31.5-[12+18]=1.5 \mathrm{~J}$

7 (iv)
$t_{1}=0.8 \div 3=\frac{4}{15} \mathrm{~s} \quad / 0^{2}=3^{2}+2 a(0.5)$ i.e $a=-9 \mathrm{~m} \mathrm{~s}^{-2}$
$0=3-9 t_{2}$ i.e. $t_{2}=\frac{1}{3} \mathrm{~s}$
$t_{1}+t_{2}=0.6 \mathrm{~s}$ 5

8(a) (i)
$U_{n}=a^{n} U_{0}+b\left(\frac{1-a^{n}}{1-a}\right) \quad / \quad U_{n}=C a^{n}+D$

8(a) (ii)
$U_{60}=0$
$1.0069^{60}(12000)=A\left(\frac{1.0069^{60}-1}{0.0069}\right)$ so $A=€ 244.93$

8(b) (i)
$x^{2}-2 x-8=0$ so $(x-4)(x+2)=0$
$x=4$ or $x=-2$

8(b) (ii)
$P_{n}=\alpha 4^{n}+\beta(-2)^{n}$
$P_{0}=8$ so $\alpha+\beta=8$ and $P_{1}=14$ so $4 \alpha-2 \beta=14$
$\alpha=5$ and $\beta=3$, i.e. $P_{n}=5\left(4^{n}\right)+3(-2)^{n}$

8(b) (iii)
$P_{6}=5\left(4^{6}\right)+3(-2)^{6}=20480+192=20672$ [pike]

9(a) (i)
$\frac{1}{4} 1200 \times 9.8=2940 \mathrm{~N}$

9(a) (ii)
$(6500-2940) \div 1200=2.97 \mathrm{~m} \mathrm{~s}^{-2}$

9(a) (iii)
e.g. colder road might change $\mu$

9(b) (i)

9(b) (ii)
$5 g-T=5 a$ and $T-3 g=3 a$
$a=2.45 \mathrm{~m} \mathrm{~s}^{-2}$

9(b) (iii)
$v^{2}=0+2(2.45)(0.75)=3.675$
kinetic energy $=9.1875 \mathrm{~J}$

10 (i)

20 [0/8/14/17]

10 (ii)
$B \rightarrow D \rightarrow J \rightarrow K$
5

10 (iii)
15: 29 i.e 3: 29 p.m.

10 (iv)
$233-88-66=79$ minutes

10 (v)
$C$ and $D$
justification

10 (vi)
no; 48 minutes is less than the float for $F$
